The beauty of suitable Shrub and Evergreen plantings add permanently to the charm of this attractive home

Shrubs for Flower and Foliage

Sturdy Plants for Northern Gardens

A large area of our nursery and the skill of experienced gardeners is devoted to developing our shrubs into sturdy, handsome plants that will quickly bring attractiveness to your home grounds.

Much of the beauty in the landscape planting of the home yard is supplied by shrubs. Their uses are many and the cost is nominal.

It is the softening grace of the dwarf and medium-height shrubs when planted about the house foundations that creates the transformation from bareness to beauty. The taller shrubs find their proper place in the border along the lot boundaries to give privacy or to screen out unattractive views.

PLEASE NOTE: The figures following the shrub name show the approximate height of growth.

FLOWERING ALMOND

Double Flowering Almond (*Amygdalus rosea*). 4 to 5 ft. A symmetrical upright shrub with a striking display of pink, rose-like flowers along the branches in early spring. One of the earliest shrubs to bloom. A white-flowering variety is also offered.

Modernize Your Plantings with *Evergreens*

EVERGREENS are the aristocrats of the plant world. They give dignity and charm to the home grounds. In summer and winter alike Evergreens will bring the freshness and beauty of the woods right into the yard about your home.

Some years ago Evergreens were used but sparingly and one seldom saw them except as an occasional group on the lawn of some larger property.

MODERN GARDENING FAVORS EVERGREENS

Today the striking attractiveness that is so evident in the surroundings of the newly-landscaped homes is largely the result of the generous use of evergreens in the planting. The present moderate cost and the compelling beauty of the evergreens gives them this deserving popularity.

NEW EVERGREEN VARIETIES

Fortunate we are indeed to have available many new evergreen varieties that were unknown in the past. By a wise selection and arrangement of these modern evergreen forms, a fresh interest and beauty can be given to older plantings and an unusual attractiveness to new ones.

WE HELP YOU MAKE SELECTIONS

Whether your yard plantings are now established or still to be placed you have equal opportunity to use evergreens to heighten the attractiveness of your home. We will be happy to help you make suitable selections.

SPECIAL BOOKLET—"How to Landscape Your Grounds with Evergreens." Describes the various types of evergreens with suggestions as to planting arrangements. Sent without charge on request.

A house planting in the modern mode—with Red Cedar, Arborvitae, Savin Juniper and Mugho Pines.

EVERGREENS FOR HOUSE FOUNDATION PLANTING

The dwarf-type evergreens with compact growth and refined foliage are particularly suited for planting about the building. For this purpose use such varieties as the Globe Arborvitae, Pfitzer and Savin and Bar Harbor Junipers and Mugho Pines.

At house corners and by the doorway where taller evergreens are desired the Scopulorum Juniper, Red Cedar and American and Pyramidal Arborvitae are adapted.

EVERGREENS FOR THE LAWN

For lot boundary and screen plantings and for lawn groups and specimens the taller-growing and spreading evergreens are needed. The Pines, the Spruces and untrimmed Red Cedars and American Arborvitae are suited to this use.

A colorful, well-arranged Evergreen lawn planting. Austrian Pine and Blue Spruce in the background with Siberian Arborvitae and Mugho Pines in front.

For All-Year-Around Beauty Cheerful Evergreens

EVERGREENS are a predominant part of the natural beauty of these northern states. Native to our soils and climate they are particularly well suited for use in the landscape plantings about our homes.

At the Park Nurseries the Evergreens are given particular attention to develop their full beauty of symmetrical growth. They are dug with solid root balls so that they can be moved without loss of vitality. Full planting directions are always given to assure you the best results.

Seldom does one realize how much growing-time can be saved by planting trees of substantial size so that finished results can be realized that much sooner. WE THEREFORE GIVE THE AGE AS WELL AS THE SIZE OF THE OLDER TREES TOGETHER WITH THE PRICE.

Full Grown Trees—We have many choice specimens in larger and older Evergreens than catalogued. Prices given on request.

NOTE: The figures following the name show the approximate height at maturity.

THE ARBORVITAE—Thuya

Shade Trees bring both comfort and beauty to the home grounds

Shade and Ornamental Trees

Sturdy Varieties for Shade, Shelter and Lasting Beauty

THE attractiveness and comfort that good trees bring to the home property is appreciated by everyone. The preservation of existing trees and the planting of new growth is truly of first importance in your landscape improvements. We will gladly help you select suitable varieties and plan their proper placing for your yard.

Since trees reach their maturity slowly you can save years of waiting by using larger sizes. That you may better judge the time saved by planting older stock we give both the size and the approximate age with the prices in our catalog listing.

PLEASE NOTE: The figures following the name indicate the approximate height of growth.

We Recommend These Plant Foods and Mulches

For Better Lawns and Flowers, Healthy Trees and Shrubs

Use "LOMA"—the perfect Plant Food

IT IS EFFICIENT—EASY TO HANDLE AND FREE OF ODOR

An ideal fertilizer for new lawns and for restoring old ones. "LOMA" contains all the necessary plant foods to properly nourish grass, flowers, trees, evergreens and shrubs. It will produce a luxuriant healthy growth and encourage flowering.

FOR THE LAWN—Allow 40 lbs. to 1000 sq. ft. Scatter evenly and water down thoroughly.

FOR THE GARDEN—Apply along the rows and around the plants following directions on the sack.

1937 LOMA PRICES
 10 lbs., 85 cts.; 25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.00

HELPFUL INFORMATION—A special booklet telling how to use LOMA fertilizer sent on request.

BONE MEAL

BONE MEAL. A selected, finely-ground meal of animal bone that contains valuable nitrogen and phosphoric acid plant food. A safe and excellent fertilizer for peonies, roses and all garden plants. Our Bone Meal has been slightly steamed to soften it and to hasten its fertilizing action. Apply to flower borders one lb. to 15 sq. ft. and cultivate in. Use generously around trees and shrubs.

10 lbs., 65 cts.; 25 lbs., \$1.10; 50 lbs., \$1.75; 100 lbs., \$2.75.

SULPHATE OF AMMONIA

SULPHATE OF AMMONIA. A quick-acting plant growth stimulant containing about 25 per cent ammonia. Use sparingly about garden plants to stimulate rapid development. For lawns apply in a solution at rate of 5 lbs. per 1,000 sq. ft. Water down thoroughly. In the garden do not let it touch green growth.

10 lbs., 65 cts.; 25 lbs., \$1.10; 50 lbs., \$1.75; 100 lbs., \$2.75.

MELO-GROND—Prepared Sheep Manure

MELO-GROND. A balanced mixture of SHEEP MANURE and BONE MEAL (far superior to straight Sheep Manure). A natural, organic plant food that will stimulate the growth of all plants. For lawns use 50 lbs. per 1,000 sq. ft. and water well. Inexpensive and efficient.

50 lb. bag, \$1.75; 100 lb. bag, \$2.75.

VIGORO—A Good General Fertilizer

VIGORO. A prepared plant food for lawns, vegetable and flower gardens. Directions on package. Allow 40 lbs. per 1,000 sq. ft. for lawns. Odorless—easy to use.

An important aid to more attractive lawns and flower gardens. Contains all the needed plant foods and is free of weed seeds.

25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.00.

Mulch With NUTRIA PEAT—Protects Lawns and Plants From Drouth

NUTRIA PEAT is a prepared, granulated natural peat, dark in color, that is a splendid soil builder and conditioner. It is clean and odorless. Nutria Peat will lighten and aerate a heavy soil and add the needed humus and texture to sandy soils. It holds 15 times its weight in water.

Use it generously on old or new lawns and as a mulch in the flower beds and rose garden. Makes a perfect top dressing around evergreens, trees and shrubs.

PRICES OF NUTRIA PEAT

Per bag (about 3 bu.), 90 cts.; 2 bags, \$1.50; 3 bags, \$2.00.
 (1 bag weighs 90 to 100 lbs. and covers 100 sq. ft. to depth of 1/2 in.)

This Diagram Shows How to Fertilize Your Trees

Extra plant food and water will help your trees and shrubs overcome the drouth conditions. Fertilizing keeps plants in healthy, vigorous growth.

Apply "Loma" fertilizer as shown in the diagram.

Note how the fertilizer is supplied to the roots through holes made in the ground out under the ends of the trees' branches.

For Convenience in Tree Feeding—Use The New Van Yahres Cartridge

Just dig holes at 4 to 6 ft. apart under the tree or shrub and drop in the cartridge. Efficient—easy to use—no muss—no dirt.

Price—1 Carton—(4 large cartridges) ----- 75 cts.

Full directions on the package. (Postage 15c extra.)

H. & O. "High Test" Lawn Grass Seed

The Best Seed for a Perfect Lawn

GOOD lawns logically follow the use of clean, pure seed of high germination test. H. & O. High Test Seed is dependably good—the best in quality that we can secure. Our special mixtures are the result of our experience of many years in the actual making of lawns.

There are no cheap annual or short-lived grasses such as Timothy in H. & O. mixtures. These undesirable cheap seeds are often used to make mixtures that can be sold at a low price and the purchaser learns too late that cheap seed can only mean a temporary, unsatisfactory lawn. Use the best seed obtainable and enjoy the proper results from your work and efforts.

Send for "HOW TO MAKE A LAWN." This booklet tells you how to make and care for a lawn. It gives practical and helpful information. Mailed on request.

AMOUNT TO SOW—Allow one pound of seed to every 200 square feet of new lawn area. For re-seeding on old lawns one pound of seed to 400 square feet will be sufficient.

Prices are given for seed packed and ready to ship. Please add 6c per lb. for parcel post if shipment of seed by mail is wanted.

VELVET SOD SEED

Velvet Sod Lawn Seed is an unusually high grade and careful mixture of permanent fine-bladed, rich green grasses. Specially prepared to meet the climatic conditions of our northern states. Its high weight of 27 lbs. per bushel indicates its purity and freeness from chaff and adulteration. We use this seed on all our own gardening work and recommend it as the best seed obtainable.

Velvet Sod contains Creeping Bent seed.

1 lb. 50c; 5 lbs. \$2.25; 10 lbs. \$4.25; 20 lbs. \$8.00.

SHADY-SIDE SEED

Where ordinary grasses will not grow we suggest sowing this special "shady-side" mixture which contains varieties naturally tolerant to shade. (Extra attention to fertilizing and watering is very important under these shade conditions and a light re-seeding each spring helps maintain the sod.)

1 lb. 60c; 5 lbs. \$2.50; 10 lbs. \$4.90; 20 lbs. \$9.40.

TERRACE SEED

On a slope the usual lawn mixtures are disappointing. For terraces we suggest this special mixture of spreading, deep rooting grasses that are resistant to drought and will thrive under unfavorable conditions.

1 lb. 55c; 5 lbs. \$2.50; 10 lbs. \$4.75; 20 lbs. \$9.00.

"Velvet Sod" Seed makes a perfect lawn.

Sow "Velvet Sod"—the best grass seed. "Velvet Sod" mixture, contains creeping bent.

WHITE CLOVER

The best imported white Dutch clover with small leaves and dense growth. Very often sown with other grasses, particularly in a new lawn, where it helps cover the ground, thicken the sod and so tends to crowd out weeds.

½ lb. 35c; 1 lb. 60c; 5 lbs. \$2.85; 10 lbs. \$5.50.

KENTUCKY BLUE GRASS

A beautiful grass that should be the main constituent of every good lawn here in the north. It is sometimes used alone but as it develops slowly, it becomes better established if sown in a mixture. Our seed is a very choice grade of carefully re-cleaned extra heavy seed with an average weight of 21 lbs. per bushel.

1 lb. 45c; 5 lbs. \$2.00; 10 lbs. \$3.75; 20 lbs. \$7.00.

RED TOP GRASS

Red Top is a fine-leaved grass that germinates and develops very quickly. It is of particular value in getting a new sod established. For a permanent lawn it should not be sown alone.

1 lb. 45c; 5 lbs. \$2.00; 10 lbs. \$3.75; 20 lbs. \$7.00.

CREEPING BENT GRASS

Sea Side Bent—A true, unmixed creeping bent seed. It produces a thick, low and close-growing turf for lawns and golf greens. (Creeping Bent sod requires often and close cutting and special attention in fertilizing.)

1 lb. \$1.00; 5 lbs. \$4.75; 10 lbs. \$9.25; 20 lbs. \$18.00.

Your inquiries are invited on matters of lawn-making, seed and fertilizer. We have a special service for golf clubs and parks.

Creeping Bent Sod Plugs

The Improved Minnetonka Strain

The specially prepared sod plugs provide an easy, modern way to introduce Creeping Bent into an old sod or to establish a new lawn.

Set the plugs firmly 12 inches apart. They will spread and touch in a season's time.

Carton—100 Bent Grass Plugs ----- \$1.25

(Enough for 100 sq. ft. of new or old lawn.)

5 cartons \$5.00—10 cartons \$9.00

(Shipping wt. per carton about 12 lbs.)

Bent Stolons in Bulk—\$5.00 per bushel

(4 bu. are required for 1000 sq. ft. of lawn.)

Full directions for planting and care given.
